

# Building a Winner

In large installations like the new, state-of-the-art professional sports stadium in Dallas, the need to protect thousands of fans and staff from fire is a monumental challenge.

For these applications, sprinkler systems must be absolutely reliable. For a job of this magnitude — or any other size job — it's important to use what's reliable and will work without fail. So for this project, the sprinkler system contractor chose the most reliable, easy-to-install equipment in the business to monitor the system: sprinkler monitoring devices from System Sensor.

Find out why System Sensor devices are the best, most-trusted choice for jobs big and small. Call 800-SENSOR-2 or visit [systemsensor.com/wf](http://systemsensor.com/wf) today.
