Time Saving (i³) Detectors Are Ideal for Commercial Applications

Because “Lost time is never found again,” minimize your maintenance times and maximize your profits by adopting System Sensor’s i³ smoke detectors for your commercial jobs.

With a push of a button on the 2W-MOD2 module, you can perform the EZ Walk loop test. A double-blinking LED at each detector will confirm that your i³ smokes are properly wired.

System Sensor also offers a handheld, infrared sensitivity reader (SENS-RDR) to view your detectors’ exact sensitivity measurements by percent per foot obscuration. You won’t even need a ladder for those hard-to-reach units because the reader can be used with a standard threaded extension pole.

To uncover more features of the i³ series from System Sensor, call us at 800-SENSOR2 or visit our website at www.systemsensor.com/i3.
