

Our smoke detectors **protect families.**

Our waterflow detectors
protect their homes.

Fire or accidental sprinkler activation, the home needs to be protected.

Fire sprinkler systems are designed to minimize fire damage and protect places and people where they live and work. But if they don't operate as expected, the results can be costly and tragic.

With System Sensor waterflow detectors, if a sprinkler head is activated and water begins to flow, a signal is sent to the fire alarm control panel or notification device. This enables personnel to respond quickly, minimizing damage from fire or the water used to put it out.

For over 25 years, System Sensor has provided innovative products that save lives and protect property. To learn more about our waterflow detectors or our complete line of sprinkler monitoring products, visit systemsensor.com/wf.
