New Duct Smoke Detector Offers Adjustable Shape for Unprecedented Mounting Flexibility

St. Charles, IL (September 2, 2008) – System Sensor today announced the release of its versatile InnovairFlex™ duct smoke detector line. With InnovairFlex, one unit can accommodate multiple installation footprints to overcome mounting constraints — a first for duct smoke detectors.

“This revolutionary design began with extensive customer research. We took our customers’ wish list and fed that information back to our engineers,” said Andy Kuester, System Sensor director of product marketing. “This collaboration led to the amazing collection of upgrades included in InnovairFlex, including its unique ability to convert to multiple footprints.”

The InnovairFlex product line also offers superb false alarm immunity, a broad temperature range from -4°F to 158°F (-20°C to 70°C), easily visible status indicators and a readily accessible test feature. For increased ease of installation, technicians can now install the new sampling tubes for InnovairFlex from the front or back without using tools by snapping them into place. In addition, for retrofit applications, designers have ensured that sampling tube spacing lines up with existing models.

Finally, the range of InnovairFlex products and accessories can meet any code requirements and are backward compatible to existing Innovair products.

For more information about the InnovairFlex product line, contact System Sensor at 800/736-7672 or visit www.systemsensor.com/flex.
