BEAM1224(S)
Conventional Single-ended Reflected Type Beam Smoke Detector

Model BEAM1224 (S) is uniquely suited for protecting open areas with high ceilings — areas where other methods of smoke detection are difficult to install and maintain.

Features
- 16- to 328-foot protection range
- Single-ended, reflective design
- User-friendly alignment procedure
- Six user selectable sensitivity levels
- Optional integral NFPA 72 sensitivity test feature
- Removable plug-in terminal blocks
- Digital display for easy alignment
- Built-in automatic gain control compensates for signal deterioration from dust build-up
- Remote test station option
- Paintable cover
- Easiest alignment in the industry
- Heater kits for transmitter/receiver and reflector option

System Sensor Model BEAM1224 is a four-wire conventional reflected beam smoke detector, which is uniquely suited for protecting open areas with high ceilings, where other methods of smoke detection are difficult to install and maintain. It is to be used with UL Listed compatible control panels only. An advantage of this single-ended reflective design is that it is much easier to install than the dual-ended projected beam detectors. Alignment is quickly accomplished via an optical sight and a two-digit signal strength meter incorporated into the product. Another advantage of the BEAM1224 is that it is listed for operation in temperatures ranging from –22°F to 131°F. This means it can be used in open areas to provide early warning in environments where temperature extremes may exceed the capability of other types of smoke detectors.

BEAM1224 consists of a transmitter/receiver unit and a reflector. When smoke enters the area between the unit and the reflector, the smoke causes a reduction in the signal. When the smoke level reaches the predetermined threshold, an alarm is activated.

BEAM1224 has four standard sensitivity selections, along with two Acclimate™ settings (adjustable sensitivity). When one of the two Acclimate settings is selected, the detector will automatically adjust its sensitivity using advanced software algorithms to choose the optimum sensitivity for the specific environment.

BEAM1224S is also equipped with an integral sensitivity test feature, which consists of a test filter attached to a servo motor inside the detector optics. When the remote test station RTS451 /RTS151 is used, the motor is activated and moves the filter into the pathway of the light beam, to test the detector's sensitivity. This integral sensitivity test feature allows the user to quickly and easily meet the annual maintenance and test requirements of NFPA 72.
BEAM1224(S) Specifications

Operational Specifications
- **Protection Range**: 16 ft. to 328 ft. (5m to 100m)
- **Adjustment Angle**: +/- 10 Degrees horizontal & vertical
  (The optics move independent of the unit)
- **Sensitivity Levels**:
  - Level 1 – 25%
  - Level 2 – 30%
  - Level 3 – 40%
  - Level 4 – 50%
  - Acclimate Level 1 – 30–50%
  - Acclimate Level 2 – 40–50%
- **Fault Condition (Trouble)**:
  - 96% or more obscuration blockage
  - In alignment mode
  - Improper initial alignment
  - Self-compensation limit reached
- **Alignment Aid**:
  - Optical gunsight
  - Integral signal strength indication
  - 2-digit display
- **Alarm Indicator**:
  - Local red LED and remote alarm
- **Trouble Indicator**:
  - Local yellow LED and remote trouble
- **Normal Indicator**:
  - Local flashing green LED
- **Test/Reset Features**:
  - Integral Sensitivity Test Filter (BEAM1224S only)
  - Sensitivity filter (Incremental scale on reflector)
  - Local alarm test switch
  - Local alarm reset switch
  - Remote test and reset switch (Compatible with RTS451/RTS151 and RTS451KEY/RTS151KEY test station)

Environmental Specifications
- **Temperature**: –22°F to 131°F (–30°C to 55°C)
- **Humidity**: 10–93% RH Noncondensing

Electrical Specifications
- **Voltage**:
  - 10.2 to 32 VDC (BEAM1224)
  - 15 to 32 VDC (BEAM1224S)
  - BEAM1224S should not be used with 12V power sources
- **Avg. Standby Current (24VDC)**: 17mA Max
- **Avg. Current During Testing**: 500mA Max
- **Avg. Alarm Current (24VDC)**: 38.5mA Max
- **Avg. Fault Current (24VDC)**: 8.5mA Max
- **Avg. Alignment Mode Current (24VDC)**: 28mA Max

Machine Specifications
- **Detector Dimensions**: 10”H x 7.5”W x 3.3”D
  (254mm H x 191mm W x 84mm D)
- **Reflector Dimensions (16’ to 230’)**: 7.9” x 9.1” (200 x 230mm)
- **Reflector Dimensions (beyond 230’)**: 15.7” x 18.1” (400 x 460mm)

Electrical Specifications (BEAMHK)
- **Voltage**: 15 to 32V
- **Current**: 92mA at 32V
- **Power Consumption**: 1.6W @ 24V, 3W @ 32V
